

**Amendment to the Specification:**

In the paragraph bridging pages 11 and 12, please replace the paragraph with the following corrected paragraph:

--These and other aspects of the present invention may be more clearly understood with reference to Fig. 3. Preferably, when used for containing pizza, the blank 20 is configured such that first portion 26 defines a bottom of the full sized pizza box and second portion 28 defines a top of the full sized pizza box. Thus, when first portion 26 is separated from second portion 28, as shown, and segments 44 are separated from each other, as shown, ~~segments 44~~ any unserved pizza can be contained [[on]] in space saving box made from folded first portion 26, and individual slices thereof can be contained on segments 44, which will be relatively free of grease, sauce and/or cheese.--
